

# FULL MOUTH IMPLANT SUPPORTED REHABILITATION

November 11, 2022

DIO navi.

## Speakers

**Dr. Aniket Chatterji**  
MDS (Periodontics)

**Dr. Rohan Gupta**  
MDS (Periodontics)

Full-mouth rehabilitation of edentulous patients with dental implants is nowadays a predictable treatment protocol. However, meticulous diagnosis and treatment planning is required in order to avoid prosthetic failure and it should include proper diagnosis, case selection, diagnostic study casts, appropriate radiographic imaging, and referrals to specialists when indicated. An evaluation of adequate restorative space during the diagnostic phase and prior to implant placement is a crucial factor in the success of reconstructions. The fabrication of restorations with inadequate restorative space may result in aesthetic, mechanical, and biologic complications. In addition, improperly placed and/or angulated implants can be challenging to restore, and their removal may be required in order to achieve acceptable functional and aesthetic outcomes. This workshop will provide you with a detailed insight on how to achieve a successful and predictable functional and aesthetic outcome.

### Venue

**IMPLANT REHAB HALL**  
Institute of Dental Sciences, BBSR

### Course fees

**INR 2000**

(Lecture + Hands on Workshop)  
\*Limited to 20 participants

## Schedule

Time	Topic
09:00 - 10:00	Introduction to Implantology Different types of Bone & Soft tissue: optimal & deficient CBCT assessment & treatment planning
10:00 - 11:00	Surgical protocols Advanced surgical techniques Complications & management
11:00 - 11:15	Tea Break
11:15 - 12:00	Hands-on: Implant placement (on Dummy)
12:00 - 12:45	Prosthetic treatment planning & solutions (various impression taking techniques, Digital Prosthetic options, Scanbody workflow)
12:45 - 13:30	Hands on Session: Intra-oral scanner Various Impression techniques Prosthetic insertion on dummy model
13:30 - 14:00	LUNCH
